QA Engineer (m/f/d)

We need you - to make plastic waste history!

Are you looking for a new challenge in a rapidly expanding start-up? Are you fed-up with plastic polluting our environment and oceans? Do you want to dedicate your professional time to more than just making money? Then we have an offer for you: **We are looking for a QA Engineer to drive cirplus forward.**

Starting date: **as soon as possible**

About us

cirplus is building the global B2B-marketplace for circular plastics. We are based in Germany, but our ambition is global. Our vision? **To make plastic 100% circular**, so that no more plastic enters the environment. We accomplish this goal with our next generation B2B-marketplace, connecting the plastic & recycling industries. To make it easy and efficient to turn waste into a valuable resource and thus catalyse the transition to a more circular planet. Tackling the plastic crisis at its root cause with technology - unlocking circular plastics: this is cirplus.

About the Role

- ***This role is fully remote.***
- Dedicating 40 hours/week is expected
- Both automated and manual test skills are **required**.

Your mission:

Set the quality standard:

- Ensure that quality is built in early on and considered in every step of the delivery process and implements correct automated tests for each feature.
- Create and maintain up-to-date test plans for ongoing regression testing.

- Identify and target areas of improvement by teaching testing and organising shared testing sessions to improve the quality culture and foster the shared quality ownership.
- Manual testing for the new features

Customer obsessed: Act as customer advocate in testing functionality.

Take charge:

- Work as part of the development team and be involved in the technical decisions (such as the design of new features).
- Participate in all scrum ceremonies like Design Discussion, Grooming, Sprint Retrospective etc.

Document:

- Provide testing guidelines and testing data for developers at an early stage of feature development.
- Provide Manual testing guidelines for the features that are not covered by the automated testing.

Empower Each Other:

- Assist developers in doing proper testing.
- Identify and target areas of improvement by teaching testing and organising shared testing sessions to improve the quality culture and foster the shared quality ownership.

Have fun working together: self-explaining ;)

Your profile:

- **3+ years of experience** in QA of web applications (experience in working with React, Cypress and Pact is a plus).
- Experience in **automated** testing
- Experience in **manual** testing
- You have excellent communication skills (fluent in English)
- A good eye on UI/UX and known modern UI/UX trends
- You are keen to learn new technologies and have ideas about how we make things better
- **Empathetic team player:** we cannot save the world on our own - no one can go it alone. We cherish a strong team culture and put our core values into practice - and so should you.
- **Owning the product** - ability to manage yourself without close supervision
- Passion for product development and user experience.
- Understanding of CI/CD
- API testing experience is a plus
- Strong passion for doing something good for the world

Benefits

- You will have the unique opportunity to grow as a **leader** and **shape the future** of the company by being the first QA engineer of cirplus
- Independent decision making
- **Work for a purposeful project**, tackling one of the largest environmental challenge of our time
- Full-time employment opportunity. **Stock option packages are negotiable** upon successful completion of the trial period.
- Key impact on **product & team development** of early stage start-up - directly shape the next steps for our product
- Join a diverse & driven group of **sustainability heroes** spanning three continents
- Flexible working hours - **fully remote working** is possible
- **Company retreats** near the ocean, to remind us of our mission to make plastic waste history
- Nothing feels better than doing good to the world *and* earning money :)

Interested? We are looking forward to hearing from you.

Include your CV and answer the following questions in your application:

1. **Why are you interested in working with cirplus?**
2. **What did you achieve throughout your career that no one else could have achieved?**
3. **What would cirplus be missing if we did not hire you?**

Send it to join@cirplus.com and become part of our mission!
